The International Agency for Research on Cancer : WHO Classification of Tumours of Haematopoietic and Lymphoid Tissue [OP] (IARC WHO Classification of Tumours) before purchasing it in order to gage whether or not it would be worth my time, and all praised WHO Classification of Tumours of Haematopoietic and Lymphoid Tissue [OP] (IARC WHO Classification of Tumours):

1 of 1 people found the following review helpful. required diagnostic hematopathology manualBy randomAs the standard diagnostic classification manual, this is a must-have for any hematopathologist. You have to get the 2016 updates from Blood to be current, but that just means they probably won't be publishing a new one for a while.0 of 0 people found the following review helpful. Four StarsBy akankeVery informative0 of 0 people found the following review helpful. Five StarsBy CustomerExactly as described....a welcome tool for my classes

WHO Classification of Tumours of Haematopoietic and Lymphoid Tissue is the third volume in the new WHO series on histological and genetic typing of human tumors. This authoritative, concise reference book covers the entire range of leukaemias and lymphomas. It provides an international standard for oncologists and pathologists and will serve as an indispensable guide for use in the design of studies monitoring response to therapy and clinical outcome. Diagnostic criteria, pathological features, and associated genetic alterations are described in a strictly disease-oriented manner. Sections on all recognized neoplasms and their variants include new ICD-O codes, incidence, age and sex distribution, location, clinical signs and symptoms, pathology, genetics, and predictive factors. The book, prepared by 130 authors from 22 countries, contains more than 1,000 color photographs, numerous magnetic resonance and ultrasound images, CT scans, charts, and 2,500 references. This book is in the series commonly referred to as the "Blue Book" series. Contributors: Dr Cem Akin, Dr Ioannis Anagnostopoulos, Dr Katsuyuki Aozasa, Dr Daniel A. Arber, Dr Michele Bacarani, Dr Barbara J. Bain, Dr Giovanni Barosi, Dr Lrith Baumann, Dr Marie-Christine Bene, Dr Daniel Benharroch, Dr John M. About the Author The International Agency for Research on Cancer (IARC) is part of the World Health Organization. IARC's mission is to coordinate and conduct research on the causes of human cancer, the mechanisms of carcinogenesis, and to develop scientific strategies for cancer control. The Agency is involved in both epidemiological and laboratory research and disseminates scientific information through publications, meetings, courses, and fellowships. S. Swerdlow E. Campo E. S.
