Marilyn A Hawkins MS RN, Timothy Porter-O'Grady, Porter-O'Grady, Marsha Parker : Whole Systems Shared Governance: Architecture for Integration before purchasing it in order to gage whether or not it would be worth my time, and all praised Whole Systems Shared Governance: Architecture for Integration:

Whole-systems shared governance is the new term for a system that unites all professionals involved in the care

delivery process -- nurses, other clinical disciplines, physicians, and administrators -- under a structure that integrates clinical, support, and organizational concerns across traditional boundaries. This book describes the context, structure, principles, and implementation of whole-systems shared governance for nurses and other health care managers and administrators. Dr. Tim Porter-O'Grady has written a dynamic new resource that ties together shared governance and the new integrated health care systems. *Whole-Systems Shared Governance: Architecture for Integration* outlines a template you can use to unite nurses, physicians, managers, administrators, board members, and other major stakeholders in planning a whole systems approach to service delivery.
