Eugene D. Frank MA RT(R) FASRT FAEIRS, Bruce W. Long MS RT(R)(CV) FASRT, Barbara J. Smith MS RT(R)(QM) FASRT FAEIRS : Workbook for Merrill's Atlas of Radiographic Positioning and Procedures: Volume 1, 11e before purchasing it in order to gage whether or not it would be worth my time, and all praised Workbook for Merrill's Atlas of Radiographic Positioning and Procedures: Volume 1, 11e:

2 of 2 people found the following review helpful. Good Study GuideBy @realCHEESEThe workbook is a great tool to study from. It gives you great information on positioning, bones and the anatomy. It's easy to work with and the best part of all, the answers are in the back. Great Book!

Practice and review the concepts presented in Merrill's Atlas! This popular workbook set includes anatomy labeling exercises, positioning exercises, self-tests, and an answer key. Types of exercises include matching, labeling and identifying anatomy, short-answer and multiple-choice questions, crosswords, true/false, fill-in-the-blank, identifying structures on radiographs, and identifying proper patient positioning. A must-have for radiography students! Exercises correspond to chapters in Merrill's Atlas, providing strong support for teaching and learning. Essential projections are those most frequently performed and determined to be necessary knowledge for entry-level competency. Anatomy and positioning exercises provide balanced coverage of both topics. Film evaluation exercises include radiographs with accompanying questions on why an image is inadequate, leading to fewer repeat exams in the practice environment. A wide variety of review exercises are used to cover different kinds of information. An abundance of labeling exercises include about 600 illustrations for labeling practice, ensuring that students recognize anatomical structures on actual radiographs, not just on line drawings. Comprehensive self-tests end each chapter, so that students can accurately gauge their comprehension of the material and measure their own progress. Pathology exercises help radiographers understand which projections will best demonstrate various pathologies. Additional exercises covering all chapters in Merrill's Atlas Volumes 1 and 2 and some in Volume 3, including: Compensating Filters Geriatric and Pediatric Radiography Mobile Radiography Surgical Radiography Computed Tomography Exercises to review abbreviations Exercises on aspects of digital imaging related to positioning and procedures
