It includes several removable study aids such as ECG strips and drug flash cards. These were really helpful. I appreciated the variety of question types (fill-in, matching, completion, multiple choice, as well as case scenarios). It is useful for reinforcing learning from the text book.My only criticism so far is that occasionally there seems to be a discrepancy between what is written in the text book compared to the stated answer in the workbook.0 of 0 people found the following review helpful.
