**Carolyn Kimme-Smith, Lawrence W. Bassett, Richard H. Gold : Workbook for Quality Mammography** before purchasing it in order to gage whether or not it would be worth my time, and all praised Workbook for Quality Mammography:

This workbook describes the technical factors required to obtain high quality mammograms including selection of equipment and its testing, recognition of correct positioning, the control of film development, quality assurance, and requirements for ACR accreditation. The goal of the book is to help the reader recognize and correct poor quality mammograms. The text features self-assessment problems as well as questions and answer at the end of each chapter.
