Kenneth L. Bontrager MA RT(R), John Lampignano MEd RT(R) (CT) : Workbook for Textbook for Radiographic Positioning and Related Anatomy: Volume 1, 7e before purchasing it in order to gage whether or not it would be worth my time, and all praised Workbook for Textbook for Radiographic Positioning and Related Anatomy: Volume 1, 7e:

1 of 1 people found the following review helpful. The pencil and pen marks bleed through the paper. By Karen P The pages of this workbook are notorious for bleeding through if you write on them (which is required). I used pencil to write my answers but you could still see the lettering on the other side as if you wrote on it directly. It's very distracting! It doesn't matter if you use a pen or pencil. The lettering bleeds through to the next page. I had no choice but to keep it because it's required but it's garbage. They must've used the cheapest type of paper to print and then

charge students full price. The regular textbook is the same way. I write in my books as an additional study guide. This is ridiculous. 0 of 0 people found the following review helpful. Older version is better By David I'll give this 4 stars, but if I was just giving this how the product arrived I would give it 1 star. The text in itself is ok, the older version has the mAs associated with each technique this does not. On the how the product arrived review, it arrived along with the workbook damage pretty bad. Workbook was ripped and the book itself had damaged edges and corners. Not one to give bad reviews based on how the product arrived, but if I would have time to resend it and get another I would have cause it was damaged that bad. 0 of 0 people found the following review helpful. Great Material By Mizz Independent This book gives me that extra help I need. Great content and helps you get a better perspective.

This is Volume 1 of a two-volume set of companion workbooks for Bontrager/Lampignano: Textbook of Radiographic Positioning and Related Anatomy. The workbook supports the text and offers opportunities for application to enhance understanding and retention. The workbook features situation-based questions on positioning and anatomy with illustrations. Also included are film critique questions, laboratory activities, and self-evaluation tests. Chapter competencies are formatted as a set of tasks that the student should be able to perform after working through the chapter.
