Kenneth L. Bontrager MA RT(R), John Lampignano MEd RT(R) (CT) : Workbook for Textbook of Radiographic Positioning and Related Anatomy, 8e before purchasing it in order to gage whether or not it would be worth my time, and all praised Workbook for Textbook of Radiographic Positioning and Related Anatomy, 8e:

1 of 1 people found the following review helpful. The pencil and pen marks bleed through the paper.By Karen PThe pages of this workbook are notorious for bleeding through if you write on them (which is required). I used pencil to write my answers but you could still see the lettering on the other side as if you wrote on it directly. It's very distracting! It doesn't matter if you use a pen or pencil. The lettering bleeds through to the next page. I had no choice but to keep it because it's required but it's garbage. They must've used the cheapest type of paper to print and then charge students full price. The regular textbook is the same way. I write in my books as an additional study guide. This

is ridiculous.0 of 0 people found the following review helpful. Older version is betterBy DavidI'll give this 4 stars, but if I was just giving this how the product arrived I would give it 1 star. The text in itself is ok, the older version has the mAs associated with each technique this does not. On the how the product arrived review, it arrived along with the workbook damage pretty bad. Workbook was ripped and the book itself had damaged edges and corners. Not one to give bad reviews based on how the product arrived, but if I would have time to resend it and get another I would have cause it was damaged that bad.0 of 0 people found the following review helpful. Great MaterialBy Mizz IndependentThis book gives me that extra help I need. Great content and helps you get a better perspective.

Reinforce your knowledge of radiographic positioning and anatomy, and produce quality radiographs! Corresponding to the chapters in Bontrager and Lampignano's Textbook of Radiographic Positioning and Related Anatomy, 8th Edition, this practical workbook offers a wide variety of exercises including situation-based questions, film critique questions, laboratory activities, and self-evaluation tests.
