National Diabetes Education Program, U.S. Department of Health and Human Services, Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, National Institutes of Health : Working Together to Manage Diabetes: A Guide for Pharmacy, Podiatry, Optometry, and Dental Professionals before purchasing it in order to gage whether or not it would be worth my time, and all praised Working Together to Manage Diabetes: A Guide for Pharmacy, Podiatry, Optometry, and Dental Professionals:

The goals of *Working Together to Manage Diabetes: A Guide for Pharmacists, Podiatrists, Optometrists, and Dental Professionals* is to reinforce consistent diabetes messages across the four disciplines, pharmacy, podiatry, optometry, and dentistry (PPOD), and to promote a team approach to comprehensive diabetes care that encourages collaboration among all care providers. The following are the learning objectives for these materials; After this activity, the participant will be able to: Identify the ABCs of diabetes and their role in preventing complications; Name key messages that PPOD providers should all convey to patients with diabetes; Describe the key concerns for drug management and foot, eye, and oral health care for people with diabetes; and Identify the results of the Diabetes Prevention Program (DPP). The target audiences that may best benefit from these materials include pharmacists, podiatrists, optometrists, dentists, dental hygienists, physicians, nurses, dietitians, and others who provide care to people with or at risk for diabetes. *Working Together to Manage Diabetes* is a cross-training document. It is not a comprehensive guide to all diabetes concerns in any one of the PPOD disciplines, but is instead a "key issues" guide to messages that every health care professional can give to support comprehensive care.
